shaping tomorrow with you

**FUJITSU**

# Meeting the Modern Workplace Challenge

With the FUJITSU LIFEBOOK U7x8 family of notebooks, you can chart an effective course for your workplace IT in a hyper-connected world, meeting both corporate requirements on security and management, as well as providing users with a sleek, cool device that's ideal for workspace sharing.

## One desk – multiple workspaces

Desk sharing enables companies and their staff to use office space more flexibly and collaborate more effectively. The LIFEBOOK U7, with its choice of two port replicators, keeps desks tidy and free of cable clutter, and ensures people can get straight to work. Choose between a classic port replicator that is shareable across the family and LIFEBOOK E5 series, or a USB Type C port replicator as a single-cable solution.

## The notebook to raise your data security

Security regularly ranks high on the list of concerns of IT managers, who must deal with threats from viruses, fraud and theft, as well as risk exposure through the use of weak passwords. With a choice of palm vein authentication, fingerprint scanner or SmartCard reader, the LIFEBOOK U7 family improves security and keeps handling easy.

# Standout Benefits of the LIFEBOOK U7

The new LIFEBOOK U7 family with Intel® Core™ i7 processor strikes the perfect balance between the needs of technology decision makers and business end-users.

**Hinge Design**  
Aluminum-caged hinges to better reflect durability and reliability

**Easy to Carry**  
Starting from 1.11 kg – 19 mm thin

**Durable Material**
