#### Documentation

#### Keeping your computer clean – Notebooks, All-In-One Desktops, Tiny-In-One, and Monitors

Use the following information to keep your notebook, tablet, or all-in-one device looking shiny and new.

**Note:** Remove any media from the drives and turn off all connected devices and the computer. Then, disconnect all power sources such as batteries or power cords from electrical outlets and disconnect all cables that are connected to the computer.

##### Cleaning the cover of your computer

Occasionally clean the exterior of your computer as follows:

1. Use only mild cleaning solutions (non-ammonia based and non-abrasive) and a damp lint-free, soft cloth to clean the painted surfaces of the computer.
2. Apply non-ammonia based cleaner onto the cloth.
3. Absorb the cleaner into a sponge or lint-free, soft cloth.
4. Squeeze out the excess liquid from the sponge or cloth.
5. Wipe the cover using a circular motion taking care not to let any excess liquid drip.
6. Wipe the surface to remove any left-over cleaner.
7. Rinse the sponge or cloth with clean running water and squeeze out any excess liquid.
8. Wipe the cover with the clean sponge or lint-free, soft cloth.
9. Wipe the surface again with a dry, lint-free, soft cloth.
10. Wait for the surface to dry completely and then remove any fibers left from the sponge or cloth.
